

Say less is a real-time chat platform built for simple and efficient communication. After logging in, users can view their active rooms, recent messages and online participants. Users are able to create new rooms or join existing ones using a short code. Conversation history is saved, allowing users to continue where they left off. Keeping the conversations organized and easy to manage.

What the app does:

Authentication: Users sign up and log in to access chat features.

- Rooms: Create new rooms or join existing ones via four(4) generated codes.*
- Active View: See active rooms, recent messages, and who's online.*
- Real-Time chat: Send and receive messages instantly with live updates.*
- Organization: Messages and rooms are structured to keep chat easy to manage.*
